photonics is the study and application of
photonic systems which use silicon as an
optical medium. The silicon is usually
patterned with sub-micrometre precision, into
microphotonic components. These operate in
the infrared, most commonly at the 1.55
micrometre wavelength used by most fiber
optic telecommunication systems. The silicon
typically lies on top of a layer of silica in what

..., Gradient-index (GRIN) optics is the
branch of optics covering optical effects
produced by a gradient of the refractive index
of a material. Such gradual variation can be
used to produce lenses with flat surfaces, or
lenses that do not have the aberrations
typical of traditional spherical lenses.
Gradient-index lenses may have a refraction
gradient that is spherical, axial, or radial.,

Paper Ballot. Who would have thought that starting in the twenty-first century, the paper ballot would come to be widely viewed as the gold standard of voting technology?, 'The usual subdivision of science into chemical, physical, botanical, and other departments, necessary for the sake of clarity and convenience in teaching, soon began to dominate the outlook and work of these institutions., The EUMETSAT Polar System (EPS) consists of the ESA-developed MetOp (Meteorological Operational) series of spacecraft and an associated ground segment for meteorological and climate monitoring from polar, low Earth orbit, providing "morning" service for operational meteorology., Introduction There were two basic types of Nike missiles, - the "Ajax" saw service starting in 1953, - and the "Hercules" saw service starting in 1958., In general, polymers with a R_2SiO unit are termed silicones, while the SiO repeat unit is also called siloxane. The strength of the SiO bond gives the polymer its thermal and chemical stability, which is important for its use in high-temperature applications [1,2].In

The main drawbacks of particle beam weapons is they are power hogs, they are difficult to reduced to pistol size, and Terra's atmosphere will scatter enough of the beam to give the firer a lethal dose of radiation., Fake News Papers Fake News Videos .
